

YEAR 11 CURRICULUM MAP (Mastery)

Rationale:

The Year 11 curriculum seeks to master the knowledge and skills the students have learnt over their 5 year journey and develop how to apply complex content into assessments. We continue to provide a platform in which the learners aim high and achieve their maximum potential. Integrated within the curriculum are opportunities in which students prepare themselves for the next stage in their future learning; post 16 and beyond.

Process:

This inter-disciplinary curriculum will blend both Pyramid and Linear learning to ensure they master each subject. Goals and targets for individual learners will be set to provide a bespoke and effective learning environment.
