

YEAR 7 CURRICULUM MAP (Foundation)

Rationale:

The Year 7 curriculum is moulded around the philosophy that our new intake of students become an 'OCAer'. It epitomises our mission statement and lays the foundation for students to understand about new beginnings as they embark on the next stage of their journey. The jump to secondary education will enable the young people to build upon their Primary roots and develop skills to broaden their knowledge across a wider range of subjects.

Process:

This inter-disciplinary curriculum will enable students to take part in both Pyramid learning and Linear learning. The first, will allow subjects to interlink and feed off one another as they set the foundations, such as English, Languages and Humanities, whereas the latter will introduce students to new skills that will build the foundation for future learning e.g. Maths, Performing Arts and Computing.
