

# YEAR 9 CURRICULUM MAP (Embedding)

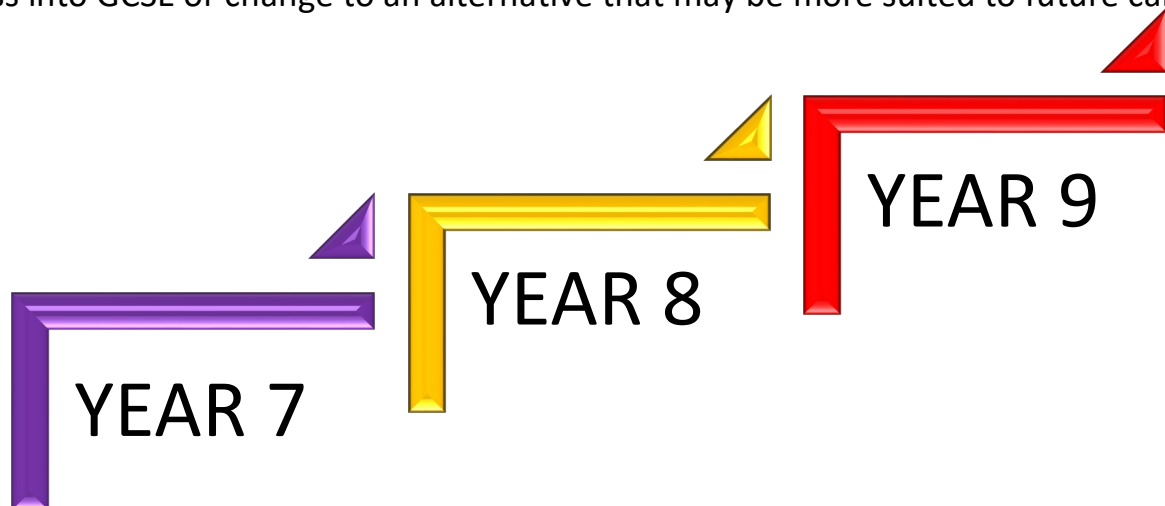

## Rationale:

The Year 9 curriculum will formulate the transition between KS3 and KS4. It will require students to continue to embed their knowledge and understanding of subject content from Years 7 and 8, whilst ensuring they have developed the necessary skills to enable them to move up to their next stage of learning (KS4).

## Process:

This inter-disciplinary curriculum will focus on Pyramid learning as the subjects will build upon prior learning in Years 7 and 8 to ensure students are set up ready to make the transition to KS4 where they will start their GCSEs. The subjects utilise each other, alongside content learnt in previous years to advance students' understanding, challenging them to a higher level of application and thought. Three blocks of mini options in Year 9, continue to provide students autonomy with their choices and gain a taster for potential routes at KS4. During these options, students will develop key skills that they can choose to progress into GCSE or change to an alternative that may be more suited to future career plans.

## MINI OPTIONS:
