## Component 1 Health and Fitness

Fitness, Heal	th, Exercise & Performa	ince		Heath Fitness & Exercise Fitness Testing							
Component	nt Definition Explanation		Exercise improves fitness, an increase in fitness will			Why					
Fitness	'The ability to meet the demands of the environmen	a window cleane worker	in your life? e.g. ness needed to be ner to an office	improve performance.  Exercise improves health  Physical – reducing the chance of CHD  Start of an exercise plan  During the plan (monitor)  At the end of a programme (has it worked)					<ul><li>Identify strengths and</li><li>Plan &amp; set targets</li><li>Check for improvement</li></ul>	Check for improvements	
Health	'A state of complete emotional, physical and socio wellbeing and not merely th absence of disease and infirmity'	ial disease and infir he socially active, p have no emotion as stress or anxie			ce stress and anxiety	health problems		resigned to identify any potential			
Exercise	'A form of activity done to maintain and improve health or physical fitness. It is not competitive sport'	th to improve healt weight, it could a you physically fir improving your s	also be making itter such as strength	12 min		darvard step 30m	sprint Sit & rea	Illinois	•	Vertical	
Performance	'How well a task is performed' hit the ball with fluency and accuracy, did you make mistakes?		cooper run	cooper swim	test		agility ru	un dynamomete	er jump		
Cardiovascular fitn	Muscular ness Endurance	Flexibility	Reaction Time	Power	Speed	Agility	Balance	Coordination	Body Composition	Strength	
'The ability to exer the entire body fo long periods of tir without getting tire	or the voluntary muscles me many times without	'The range of movement possible at a joint'	'The time taken to respond to a stimulus'	'Is the ability to do strength performances quickly' Power = Strength x Speed	'The amount of time it takes to perform a particular action or cover a particular distance'	'Is the ability to change position of the body quickly while maintaining control of the movement'	'Is the ability to retain the body's centre of mass above the base of support' static or dynamic	'Is the ability to use two or more body parts together'	'Is the relative ratio of fat mass to fat-free mass in the body'	'The amount of force a muscle can exert against a resistance'	
Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	Explanation	
Performers who exercise aerobical over a long period time and need to maintain a high quo of performance	Illy muscular endurance to dof be able to maintain a o high standard of ality performance throughout	Performers need good flexibility to be able to get into position without getting injured and to perform complex movements	Performers need to react to a stimulus. A stimulus can include: a ball, whistle, starters gun, or an opponent	Performers need power to improve performance. Speed and strength are needed in sports where you throw jump kick and sprint	Performers need speed to get from one position to another. This may be leg speed to run or arm speed when throwing or hitting	Performers need agility to change direction quickly. This can be used to evade opponents or move around the court or pitch quickly	Performers need balance so they don't fall over. E.g. in gymnastics when performing a balance (static) or travelling across the beam (dynamic)	Performs need coordination when they are using two body parts at the same time. It can be used when aiming, or striking/hitting a ball	A performer needs to have the right body composition for their sport. E.g. a marathon runner needs to be light and would have low fat and low muscle	Performers need Strength is sports that require the need to create a large force. This can be lifting, punching, tackling, shooting
